

CT Colonography (Virtual Colonoscopy)

During virtual colonoscopy, an imaging technique known as computerized tomography (CT) is used to produce hundreds of cross-sectional images of the abdominal organs. The images are combined and digitally manipulated to provide a detailed view of the inside of the colon and rectum. Unlike traditional colonoscopy, virtual colonoscopy doesn't require sedation or the insertion of a scope into the colon.

- ✔ **No sedation**
- ✔ **Simple Bowel Prep**
- ✔ **20-30 minute procedure**
- ✔ **Drive Yourself**
- ✔ **No Optical Scope - Non-Invasive**
- ✔ **Complete View of Colon**
- ✔ **3D Imaging**

Ascending colon, endoluminal view.

Transverse colon, endoluminal view.

Sigmoid colon, endoluminal view.

Descending colon, endoluminal view.

Your results will be read by a board certified radiologist and mailed to you in about 10 days. Health Check Screening has a full time gastroenterologist on staff and will consult with any patient who is found to have abnormalities or that requires follow up.

Call 405-486-7444 to schedule.
